

What the Competition Says

The following performance records were compiled by **Purina Mills, LLC** and compare **Purina Mills' Accuration** and **Impact Ration** to the **Exacta Ration** by **Great Plains Livestock Consulting, Inc.** The trial was performed by Purina Mills, LLC at Franz Farms in New Hartford, MO.

Trial Consisted Of:

Home Raised, Non-Implanted Calves fed on a self-feeder. Pens were mixed with heifers and steers, 56 head fed Purina Accuration & 55 head fed Exacta Ration.

Results:

Performance	Purina AccuRation	Exacta Ration
Days on Feed	156	163
Avg. Daily Gain (lb)	2.65	2.57
Avg. Feed/hd/day(lb)	21.04	20.54
Avg. Feed/hd/day (% BW)	2.29	2.26
Feed:Gain As-Fed (lb)	7.93	7.98

Economics	Purina AccuRation	Exacta Ration
Feed Cost of Gain (\$/cwt)	\$50.08	\$41.78
Total Cost of Gain (\$/cwt)	\$53.85	\$45.66
Savings		\$34.32/hd

- Exacta Ration proved an **\$8.19/cwt** advantage
- The difference, considered with the average total gain from Exacta Ration, produced a savings of **\$34.32** per head with the Exacta Ration compared to the Purina program.

What Producers Say

"I have been using Exacta rations for 4 years now and have gotten along great with them. This system has been like a hired hand for me. The cattle eat smaller amounts all day long. The biggest advantage is that it has enabled me to use the commodities available at varying rates according to price while still keeping the cattle at peak performance. The consumption has been right on target with my desired intake at a very low inclusion rate thanks to Great Plains Livestock Consulting, Inc."

Mark Franz
New Hartford, MO

"We have been very satisfied with recommendations from Great Plains Livestock Consulting, Inc. to use the Exacta grain mix program for our cattle. The cattle do exceptionally well on this program compared to others we have tried. It was a pleasure working with Great Plains Livestock Consulting."

EXACTA

Rations

Exacta Rations & Supplements

Exacta Ration is a state-of-the-art feed with a proprietary limiter that does not smell like fish and does not rust steel like a high salt mix does. It's been on the market since 1997 and has a proven track record. It only needs to be customized to match the desired consumption and rate of gain of your cattle. It's designed for growing calves 400-1000 lbs. with a desired gain of 0.5-3.0 lbs ADG or for breeding stock that needs additional frame and/or condition.
